

# The Mobile App

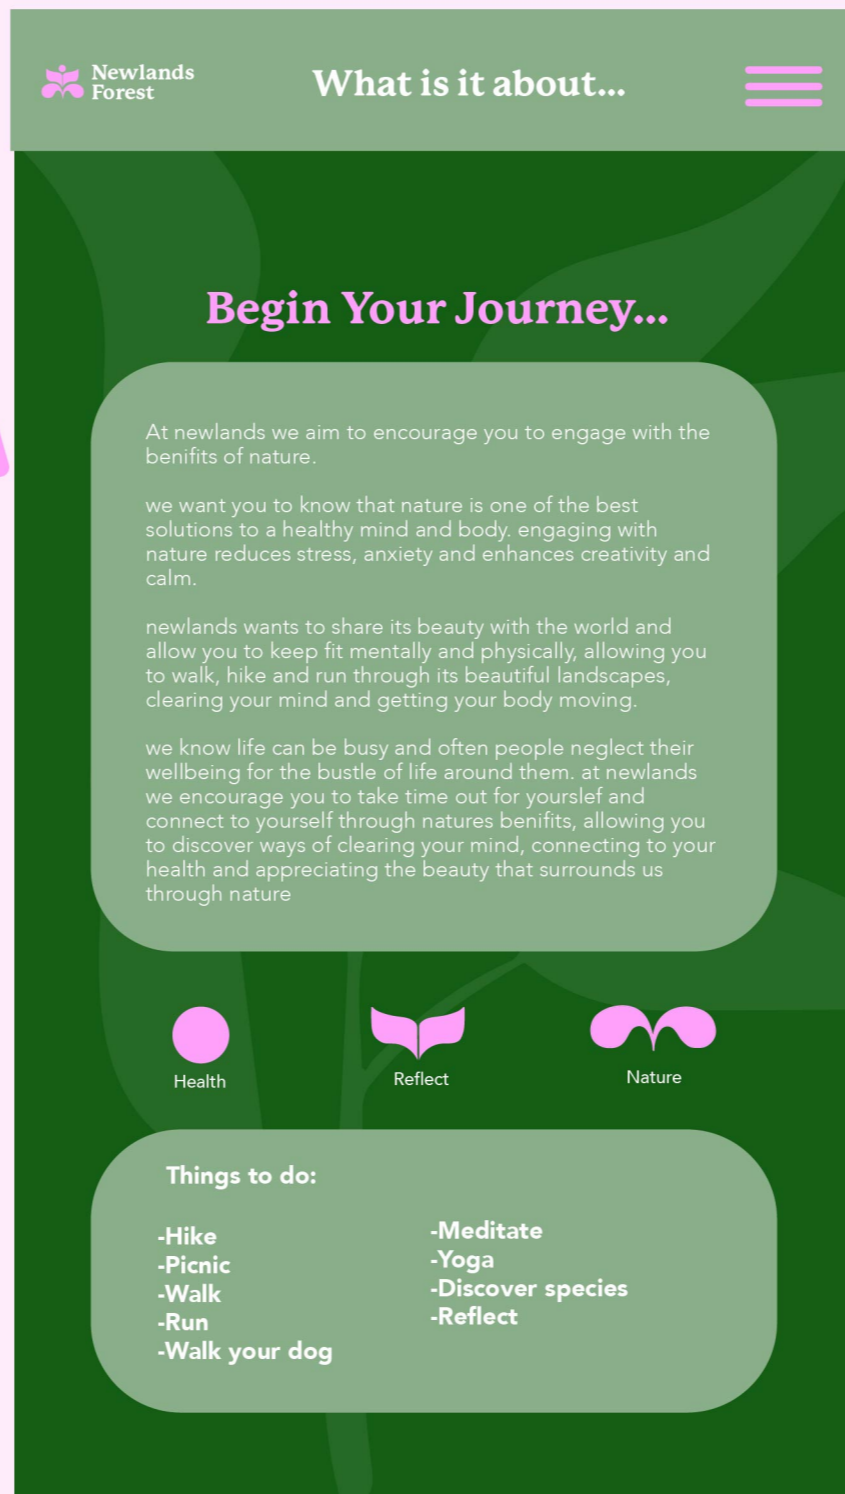

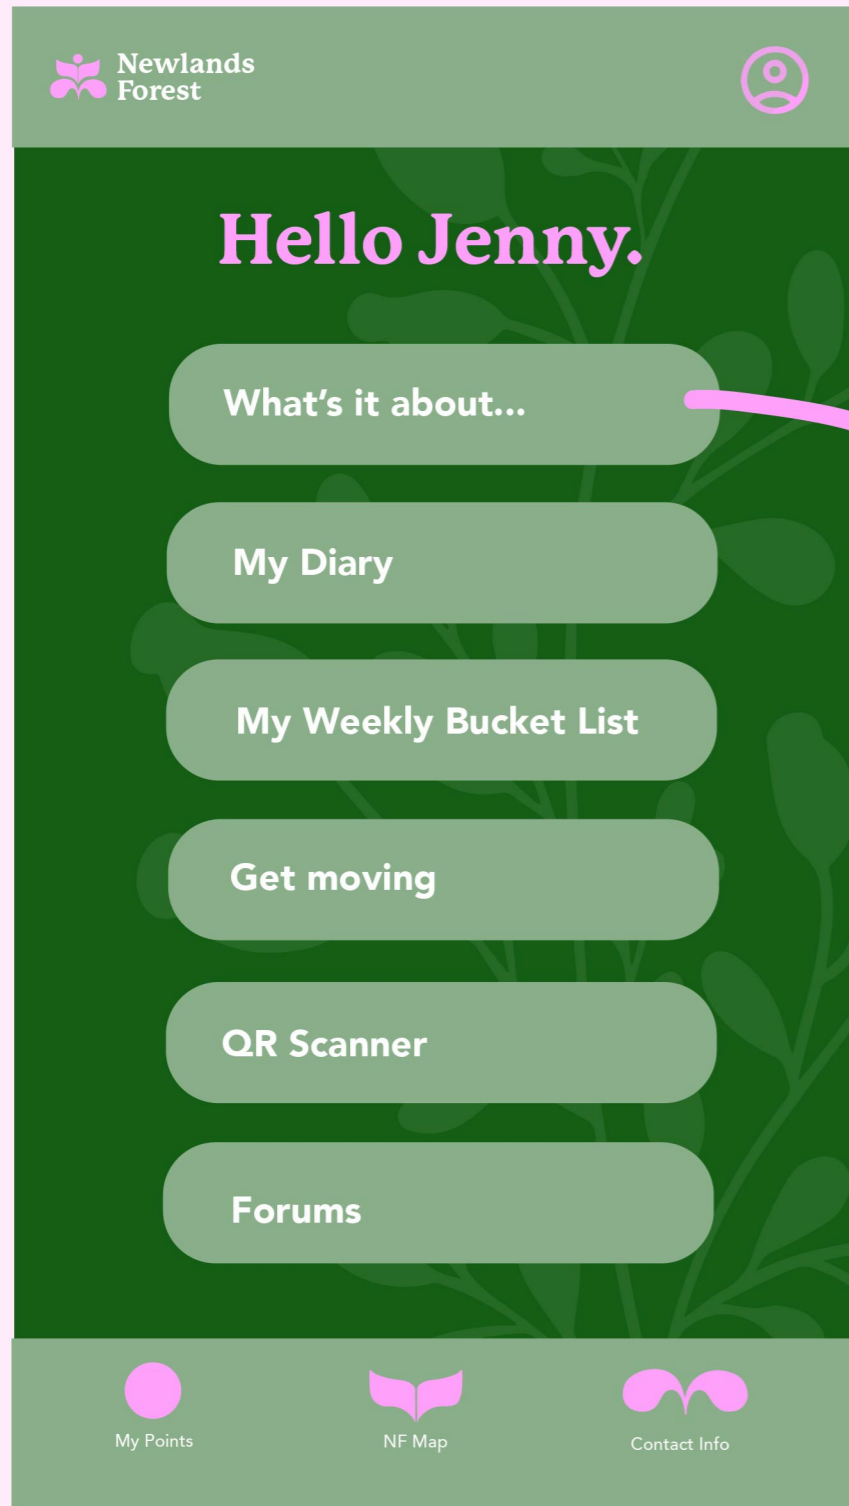

Newlands Forest

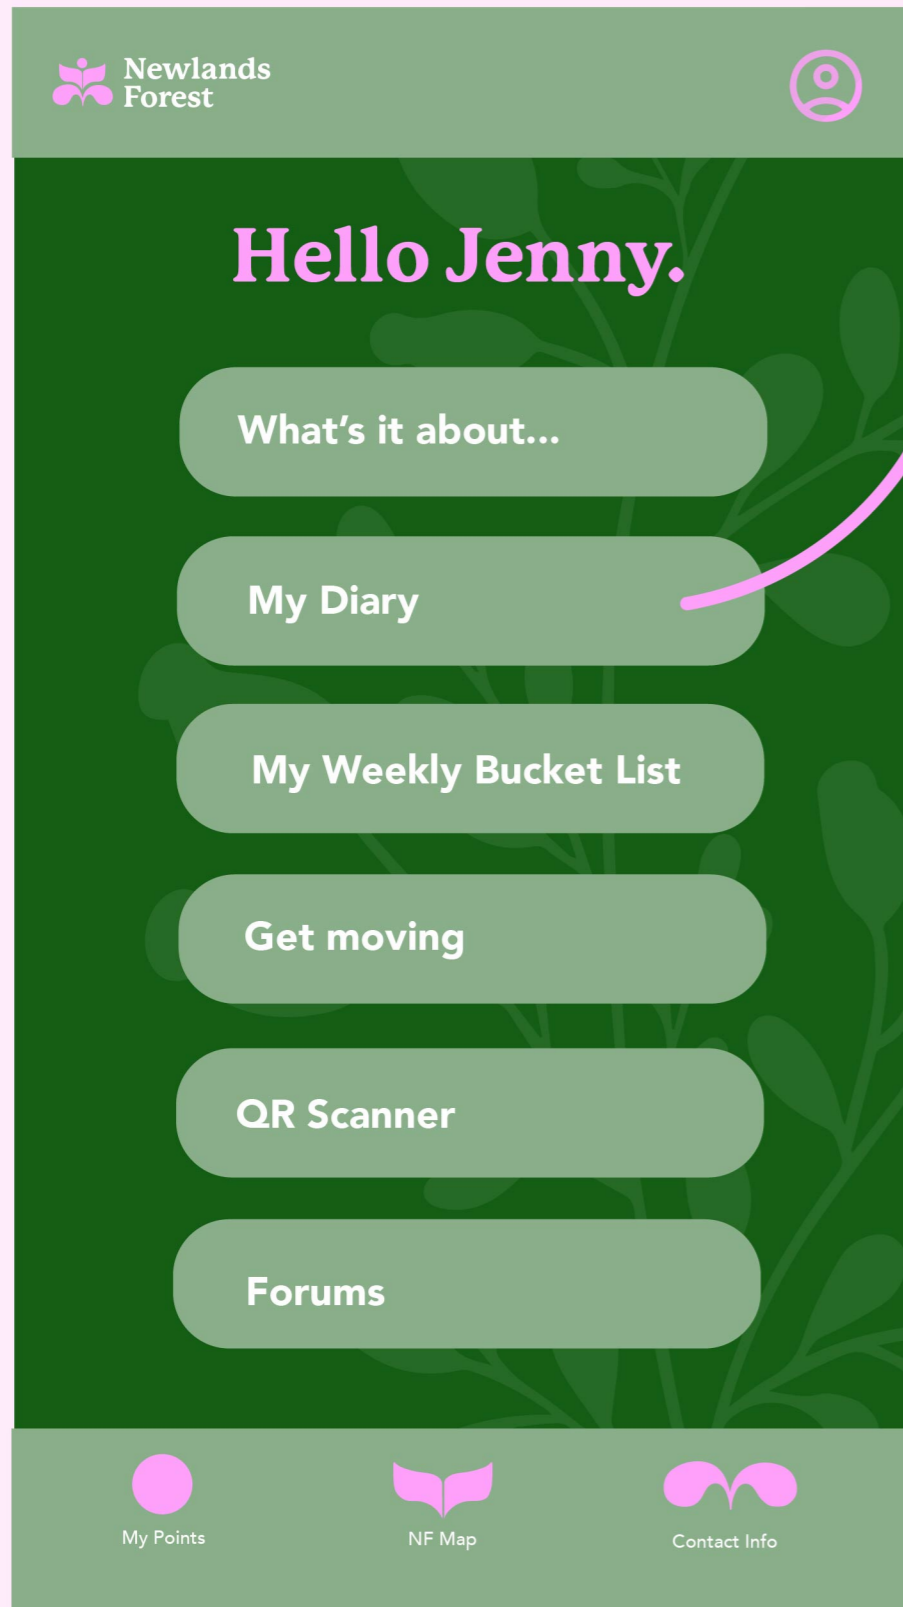

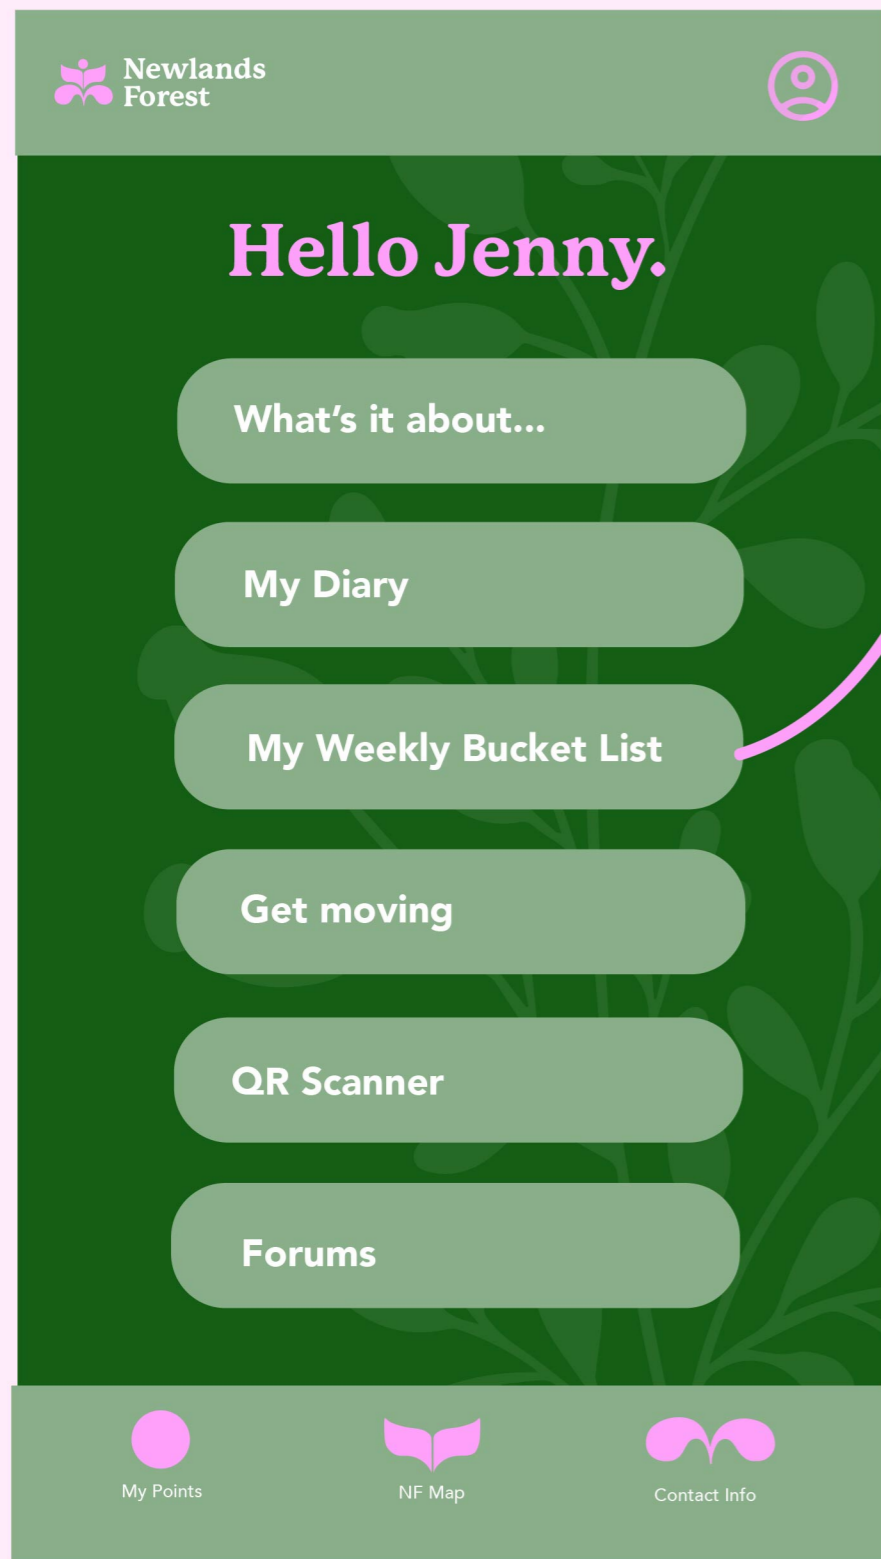

The inclusion of the "about" is important as one can understand and engage with the importance of the benefits of nature and how it can improve health. This too helps viewers understand the meaning behind the rebranding of Newlands Forest.

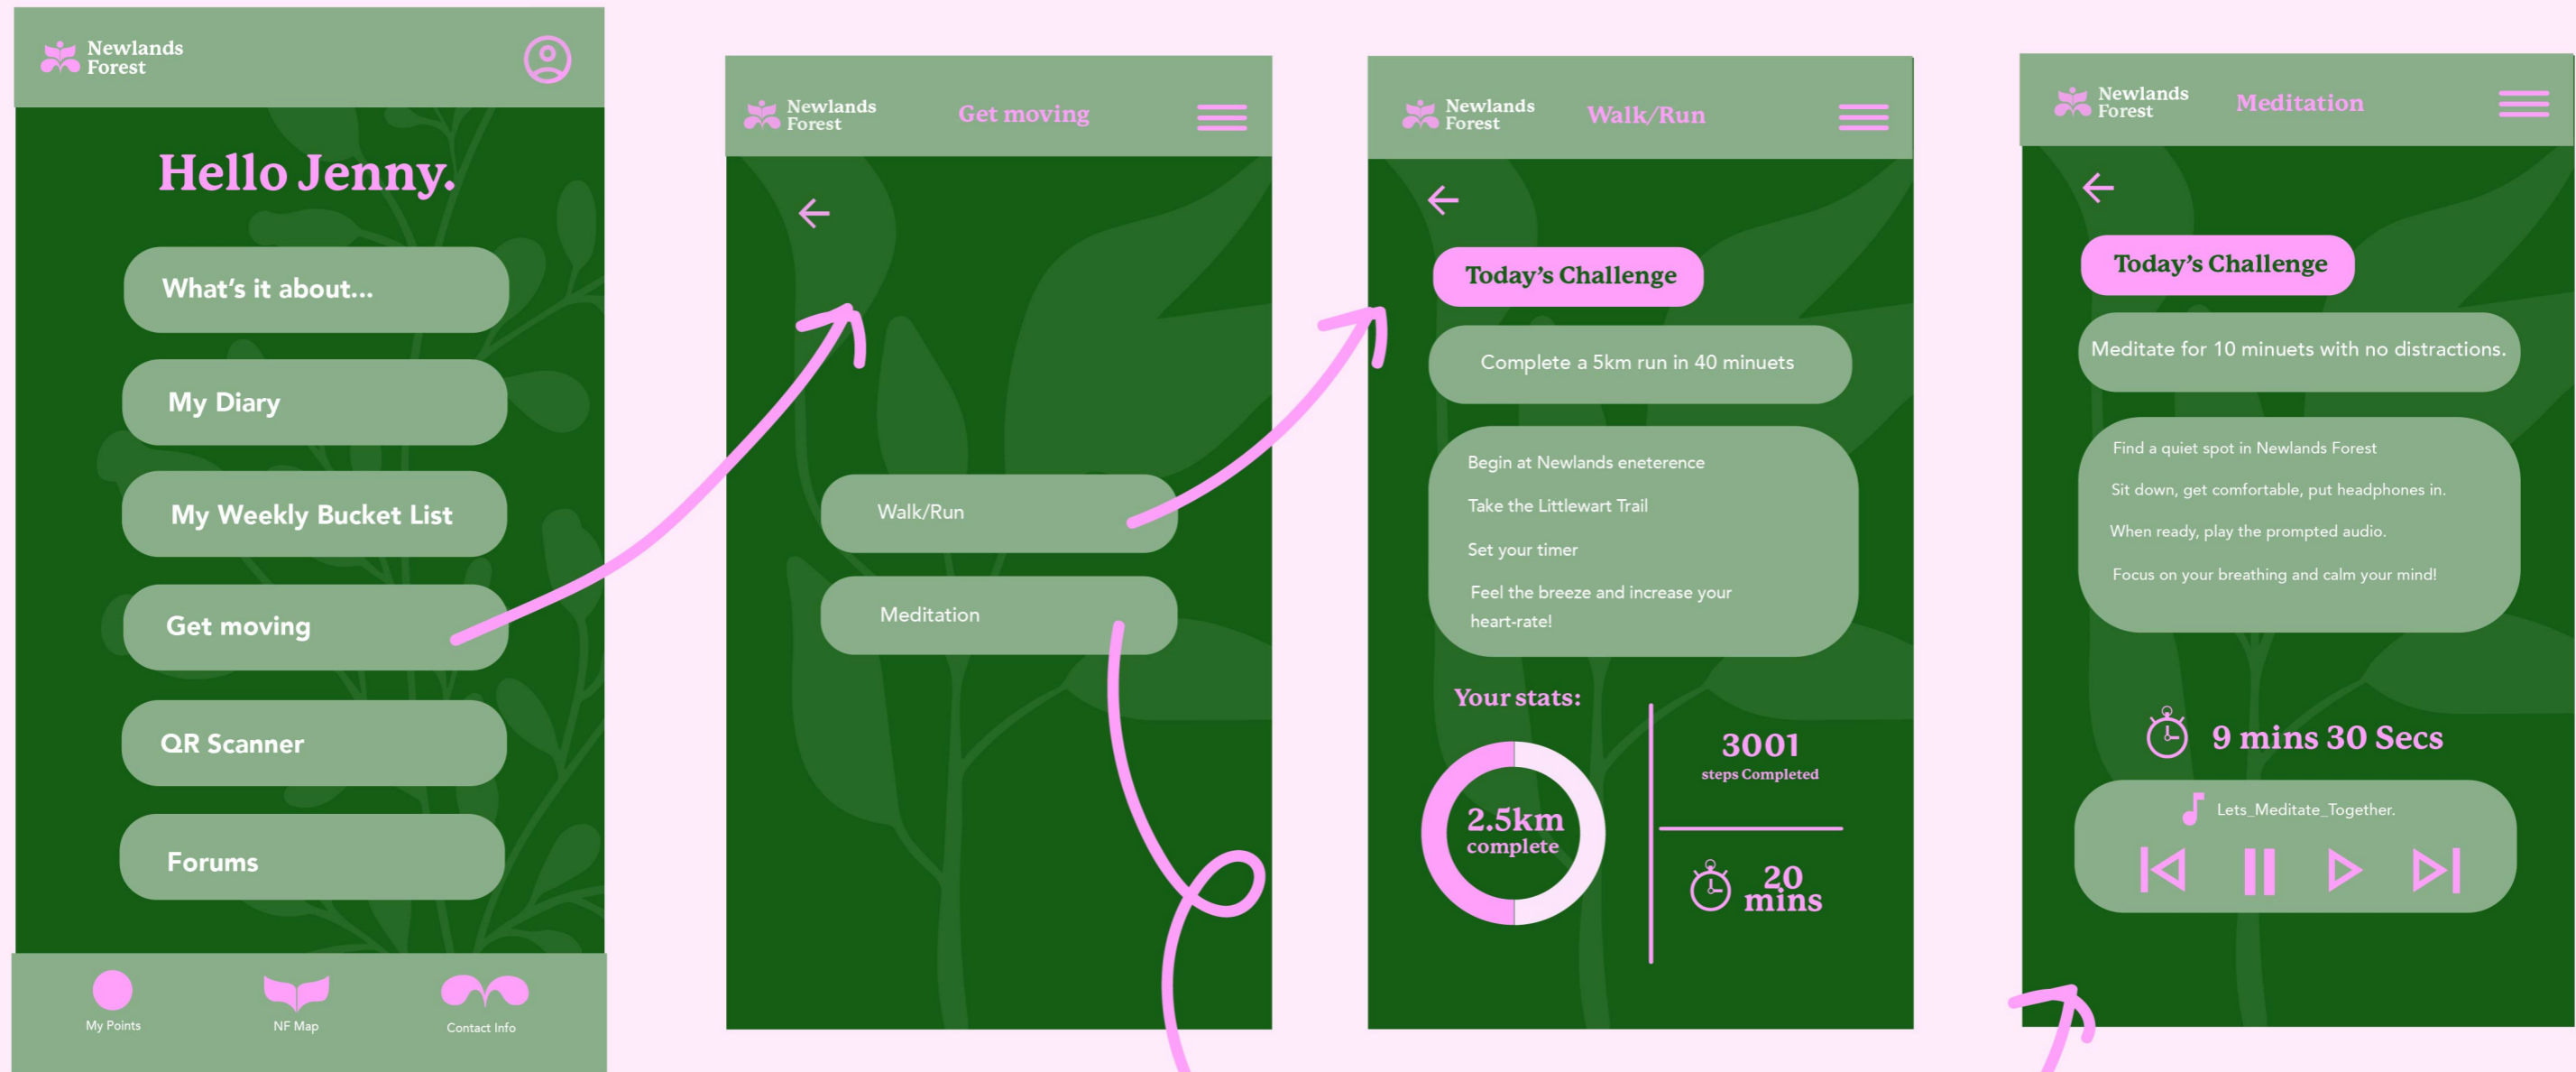

The incorporation of a virtual diary is very important for self reflection and mental health. this enables individuals to be able to reflect on the go, any time and any place.

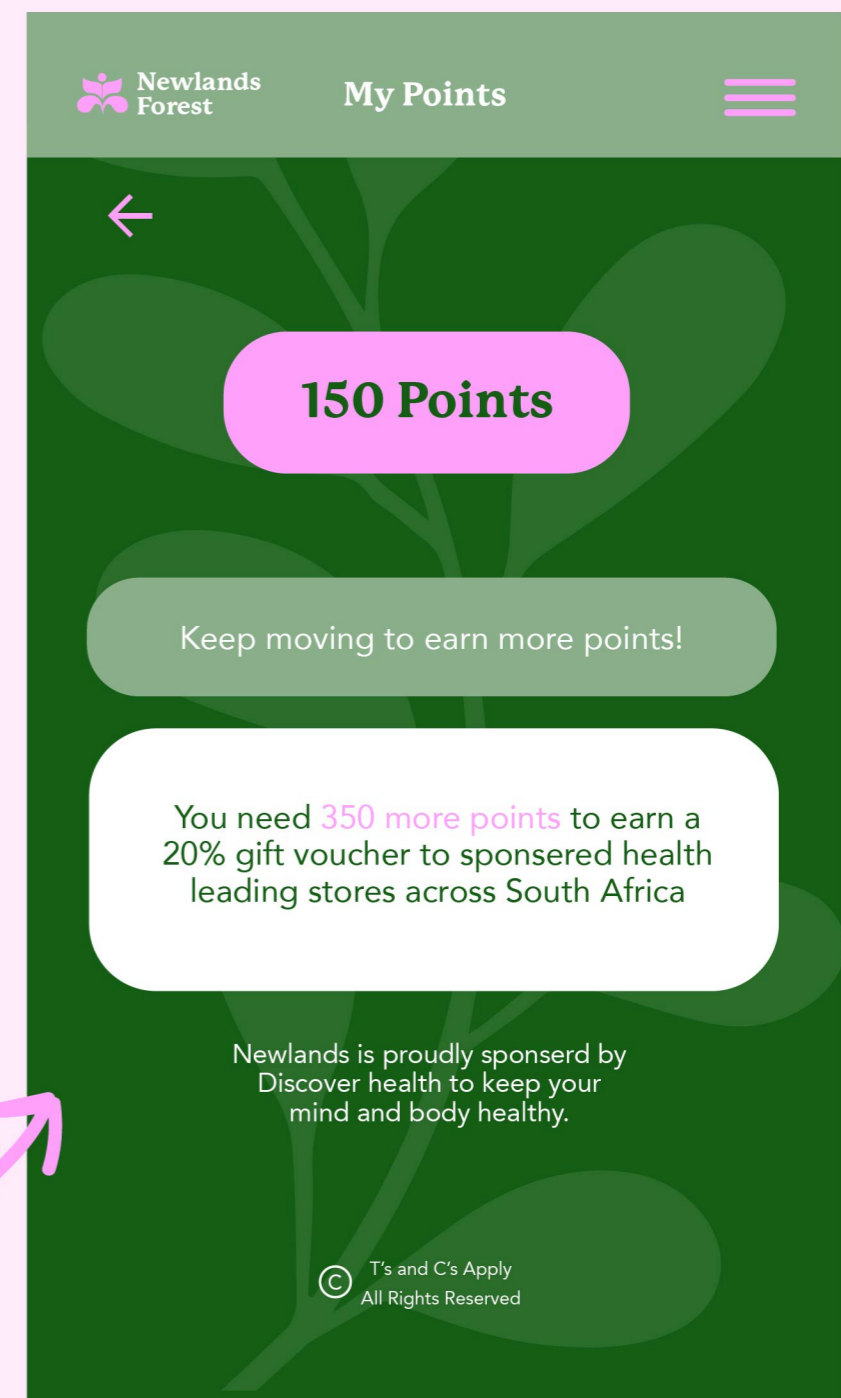

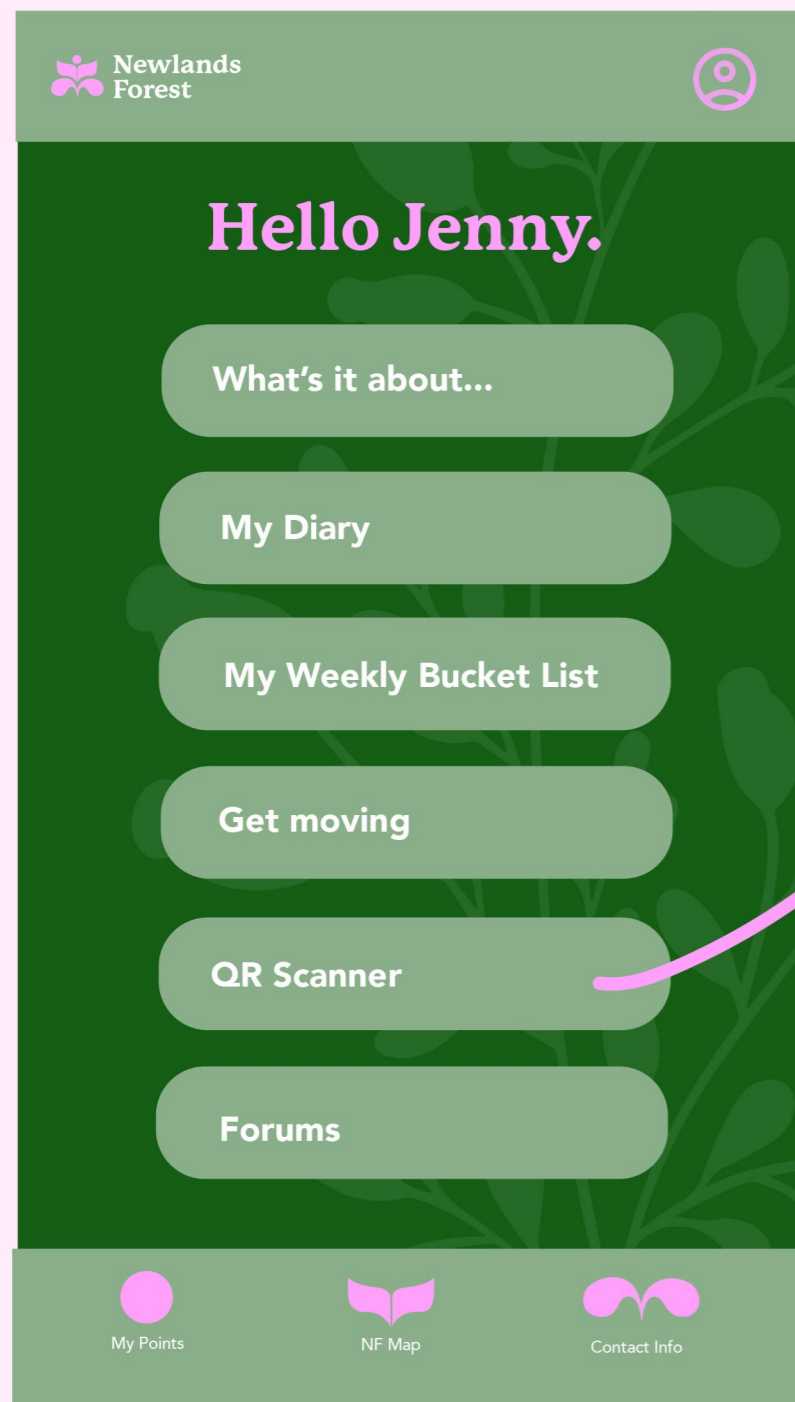

The incorporation of weekly challenges allows users to be motivated to achieve something other than work related tasks. This will encourage users to go outdoors, be active and take a break from daily work routines.

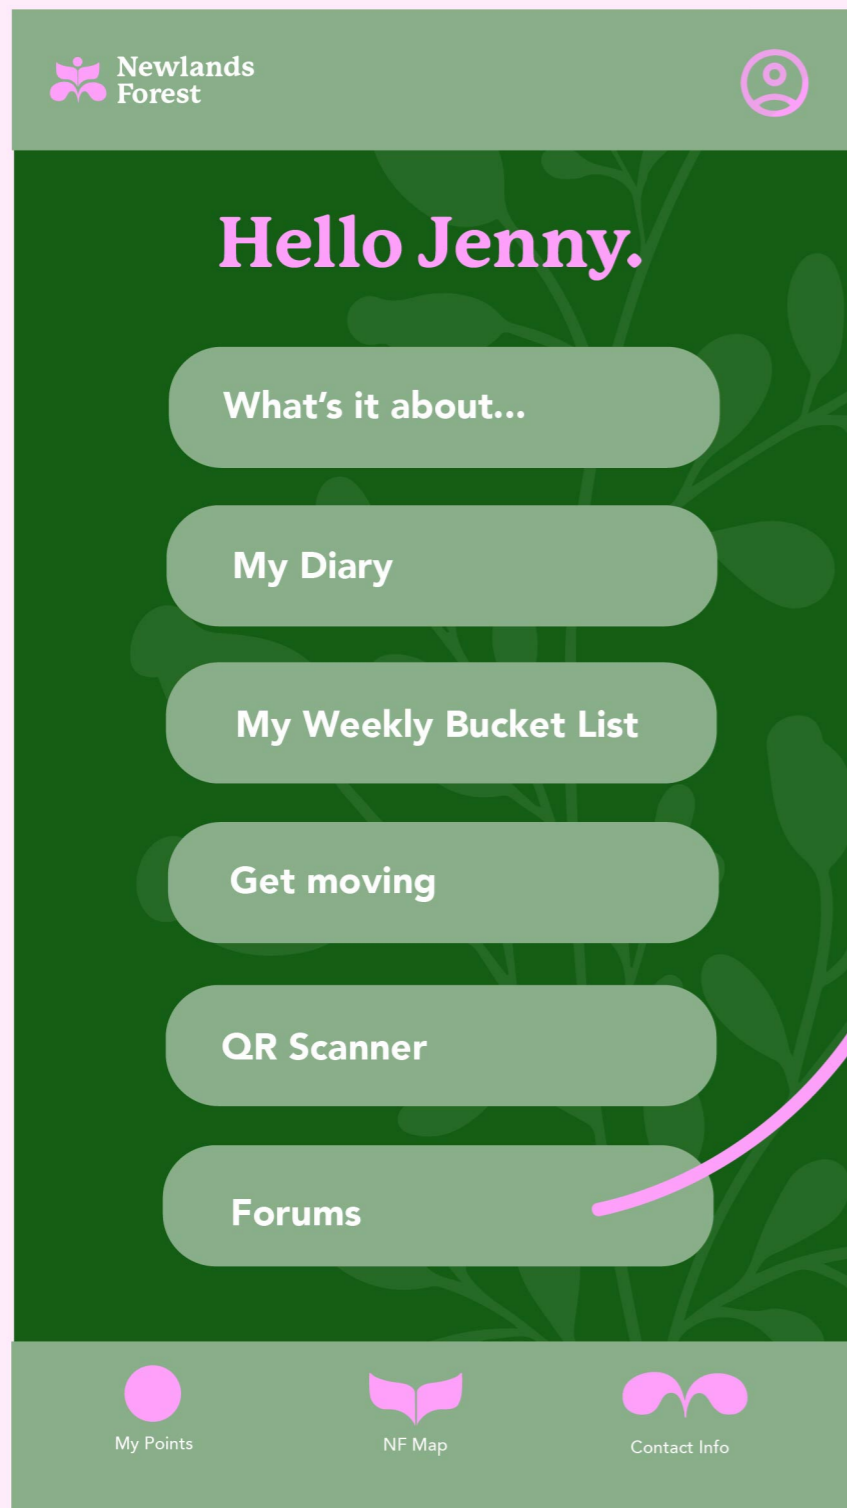

The get moving section enables users to have prompted activities to do at Newlands or at home, while improving their mental and physical health. The sections provide information such as steps count and music that will aid in the experience.

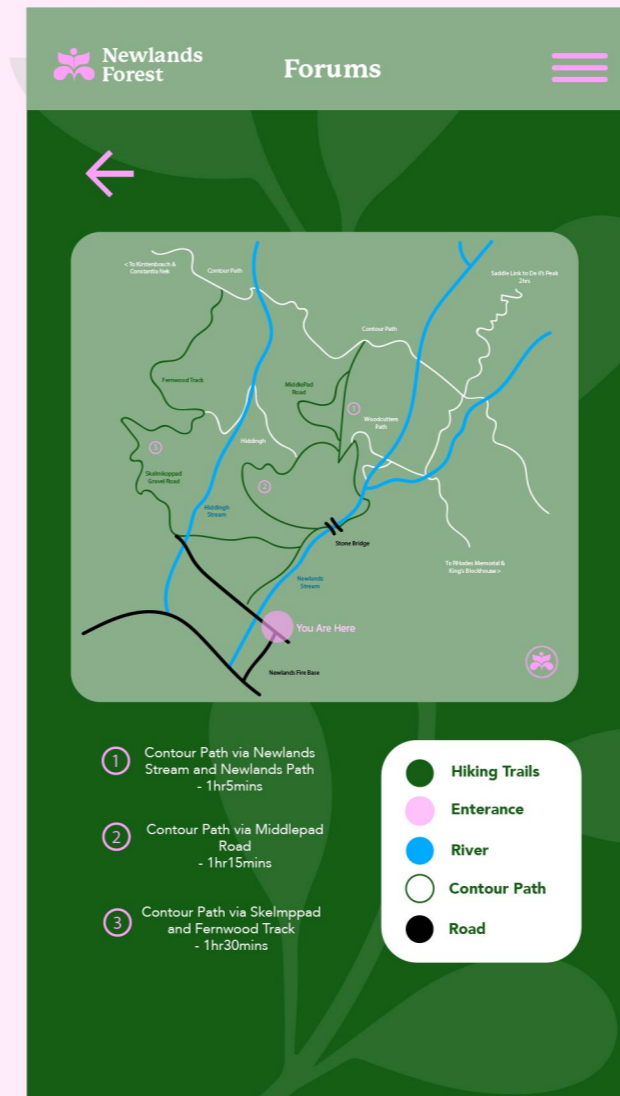

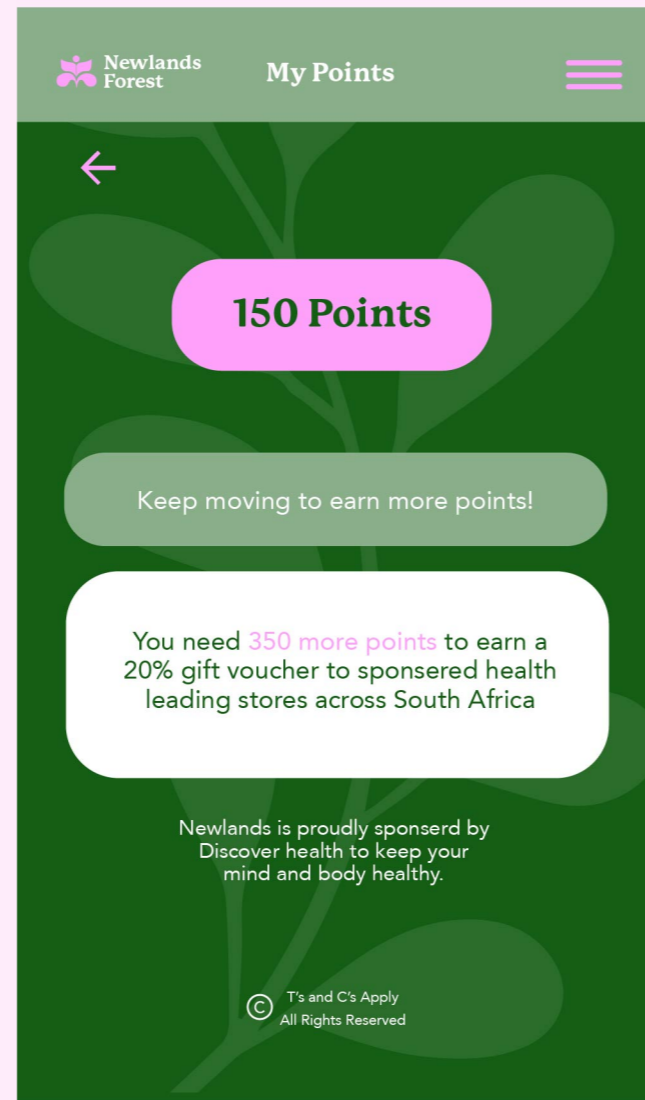

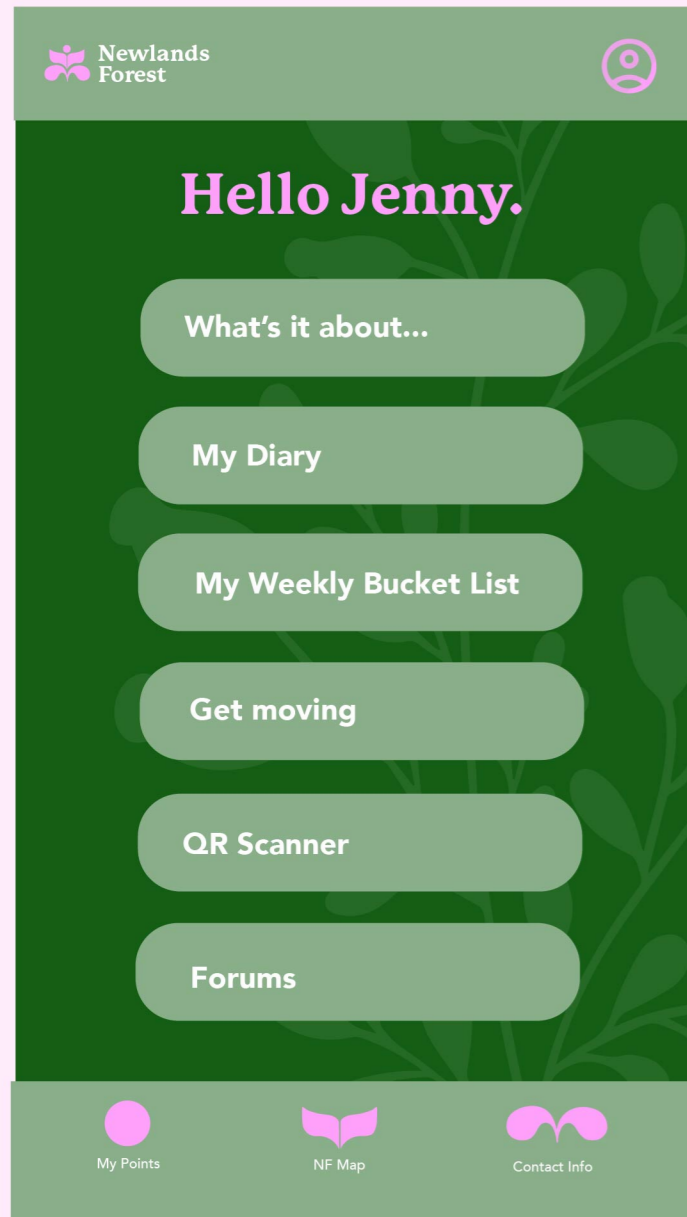

The use of the QR code can be found on the navigation signs through out the walking trails. thsi motivates users to walk and get their fitness in check. by gaining points they will earn discovery points that enables them to gain rewards such as vouchers to sports stores or health stores.

The incorporation of forums allows for users to engage with other peoples experiences and thus be motivated to go outdoors. They can also share their own stories to inspire others.

At the bottom of the app there are quick buttons for the "My Points", Navigation and contact information. this is done for the benifit of an emergency and need for quick access.
